

Welcome to

What is Luv Mi

Welcome to Luv Mi! A simple dating simulator to pursue your wildest dreams. Fall in love with pixelated characters with diverse personalities, and pursue relationships to your heart's content!

Made primarily in Java, Luv Mi presents a new take on classic dating simulators. You might not always get your desired outcome! Be careful with your choices.

Go get some Luv!

Instructions:

Luv Mi is a simple point and click dating simulator. On startup, create a "new game", and enter your name and save name. Once created, load up the save file you created with the "load game" screen and begin!

To play, simply click the text box to proceed. When presented with options, click one of the options, and let the game do the rest!

FOR SLATTERY: *When you get the files, unzip the Simulator folder and place it in your C:/ drive. The game will not work right without this.*

FAQ

1) I CLICKED ONCE WHY ISNT THE TEXT CHANGING

a) Java isn't the best for dating simulators. We tried our best. Click a couple of times to proceed! Glitches happen.

2) I FORGOT MY SAVE NAME

a) Go into your "C:\Simulator" directory and look for whatever you named it. DO NOT MESS WITH THE FILES PLEASE

3) I DIDN'T GET WHO I WANTED TO DATE

a) That sucks. Try a new game. Or maybe give up while you're ahead.

4) HOW DO I SURVIVE COMPUTER SCIENCE

a) We just don't know.
